Work Experience

Trainee MERN Stack Engineer

July 2026 – Present

Treebay Technology Pvt. Ltd. – Lucknow, Uttar Pradesh

- Contributed to the development of responsive web interfaces and implemented full-stack features utilizing the **MERN Stack (MongoDB, Express.js, React.js, Node.js)** and **Tailwind CSS**.
- Integrated **REST APIs** and collaborated with senior developers to align with industry best practices for scalable application architecture.

MERN Stack Developer Intern

Mar 2026 – June 2026

Treebay Technology Pvt. Ltd. – Lucknow, Uttar Pradesh

- Engineered the Treebay Technology industrial portfolio and career portal using the **MERN Stack**, integrating responsive UI components with backend APIs for green energy solutions.
- Managed real-world full-stack deployment workflows by routinely updating application viewers, scalable features, and environment variables to ensure platform stability.

Frontend Web Developer Intern

Sep 2025 – Nov 2025

Leafny Web Pack Services & Consultancy – Aurangabad, Maharashtra

- Engineered scalable SaaS interfaces as a frontend developer intern at Leafny Web Pack Services and Consultancy, architecting 15+ reusable **Tailwind CSS** components to reduce development time by **40%**.
- Collaborated in an **Agile** environment to deploy weekly **React.js** updates, optimizing for **SEO**, cross-browser compatibility, and improving page load speeds by **30%** through code splitting.

Projects

Treebay Technology – Renewable Energy Industrial Solutions Platform

[Live Website](#) </>

- Developed and maintained a scalable corporate platform for **renewable energy** and **industrial EPC solutions**, including detailed service pages for Bio-CNG, SAF, Bio-Ethanol, Bio-Methanol, and related technologies with responsive and SEO-friendly UI architecture.
- Built secure and scalable **Admin Panel**, **HR Panel**, and **Sales Panel** with features such as **user management**, **role-based access control**, **contact submission handling**, and operational workflow management.
- Designed and implemented a reusable **Content Management System (CMS)** supporting dynamic content updates, modular component architecture, blog/content editing, and scalable management of multiple industrial solution pages.

WebGen - AI-Powered Website Builder (SaaS)

[Link to Repo](#) </>

- Engineered a production-ready MERN SaaS platform leveraging the **DeepSeek-V3 LLM API** with high-concurrency streaming to generate semantic **HTML/CSS websites** from natural language prompts.
- Developed a **one-click deployment system** for instantly publishing AI-generated websites to production, while integrating **Monaco Editor** for VS Code-like editing and real-time preview functionality.
- Built a complete **credit and payment management system** using **MongoDB** and **Razorpay**, enabling automated credit deduction, recharge workflows, and scalable user resource management.
